ASSISTANCE IN RECOVERY

*Improving lives together*

## **Assessments**

Our Chemical Health Assessment Services help attorneys, families, trusts, and employers to meet their specific needs.

Our Assessment team will work in combination of an attorney to help those struggling in legal battles. Their case will be handled with care so they can focus on getting better.

AiR provides a variety of chemical health services to help the attorney meet their client's needs. Some of these services include:

- Chemical Health Assessments-including SASSI and ASUD-R
- Driving with Care: DUI/DWI education classes
- Recovery Assistance Program-Case Management
- Random Drug Screening
- College Support Program
- Outpatient Treatment

With the help of an attorney and the services provided by AiR, the road to recovery should be a little smoother without worrying about the legal ramifications of one's past mistakes. If you know someone that could benefit by AiR's services, act now.

## **Chemical Health Assessments**

Provides attorneys and courts written documentation that includes a narrative summary, testing results and clinical recommendations. Written assessments can be either SASSI or ASUD-R. Assessments meet all county and state requirements.

## **Recovery Assistance Program**

A comprehensive, one year, behavioral health case management program. RAP provides support and accountability through ongoing contact, collateral contact, toxicology screening and reporting.

## **College Support Program**

Provides support and accountability tailored to the needs of college students who have a mental health or chemical dependency diagnosis. Provides peace of mind, support and reporting for families.
